PROFESSIONAL SUMMARY

Full-Stack Developer with experience building web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Skilled in developing REST APIs, authentication systems, real-time applications, browser automation, and Docker-based deployments. Familiar with CI/CD workflows and modern web development practices..

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6), Python

Backend Technologies: Node.js, Express.js, FastAPI, REST APIs, Microservices, JWT Authentication, RBAC, Socket.io

Frontend Technologies: React.js, Next.js, Redux, Redux Saga, HTML, CSS

Databases: MongoDB, PostgreSQL, MySQL, Redis

DevOps & Cloud (basics): Docker, AWS EC2, GitHub Actions, Jenkins, CI/CD Pipelines

Automation & Tools: Puppeteer, Electron.js, Chrome Extension Development(basic)

Messaging & Realtime: RabbitMQ, WebSockets

AI / LLM Concepts: LLMs, RAG systems (basic understanding)

WORK EXPERIENCE

Software Developer Intern

Tek Tree LLC

Jan 2026 – Present

Hyderabad, Telangana, India

- Built scalable full-stack applications using React.js, Node.js, Express.js, MongoDB, and RESTful backend architectures.
- Developed modular backend services using clean architecture principles, service layers, schema validation, and reusable API components.
- Integrated frontend applications with backend APIs using Redux and Redux Saga for asynchronous state management.
- Implemented JWT authentication and role-based access control (RBAC) for secure authorization workflows.
- Built browser automation and scraping systems using Puppeteer and Playwright for automated data extraction and workflow automation.
- Developed Electron.js desktop applications integrated with browser automation pipelines.
- Implemented production-grade backend features including validation, file uploads, error handling, rate limiting, and middleware architecture.
- Worked with Docker, PM2, AWS EC2, and Linux deployment workflows for production deployments and server management.
- Debugged production and development issues, improving application reliability, maintainability, and backend performance.
- Worked with CI/CD workflows using GitHub Actions and explored Jenkins-based deployment pipelines.

PROJECTS

Chat-Box Application

[GitHub](#)

- **Tech Stack:** React.js, Node.js, Socket.io, MongoDB, JWT
- Built a real-time chat application supporting instant messaging, audio communication, and video communication workflows.
- Implemented JWT-based authentication and scalable socket communication architecture for real-time messaging.
- Designed backend APIs and MongoDB-based data management for users, chats, and message persistence.

Credential System (Microservices)

[GitHub](#)

- **Tech Stack:** Node.js, Express.js, MongoDB, RabbitMQ, Docker
- Built a distributed microservices-based credential issuance and verification platform using event-driven architecture.
- Implemented asynchronous communication between services using RabbitMQ messaging queues.
- Implemented idempotent credential generation and secure verification workflows.
- Containerized independent backend services using Docker for scalable deployments.

LIVE DEPLOYED PROJECTS

- **Online Product Catalog (Next.js)**
Live: online-product-catalog.onrender.com
GitHub: [GitHub Repository](#)
- **Mini Event Platform (MERN Stack)**
Live: mini-event-project.vercel.app
GitHub: [GitHub Repository](#)
- **Bills Tracker (Dockerized MERN Application)**
Live: bills-tracker-forntend.onrender.com
GitHub: [GitHub Repository](#)

EDUCATION

Matrusri Engineering College

Bachelor of Engineering in Information Technology — CGPA: 6.84

2021 – 2025

Hyderabad, Telangana

Prathiba Junior College

Intermediate MPC — 92.8%

2019 – 2021

Nalgonda, Telangana

HOBBIES

Playing Cricket and ping pong
